

LEARNING BY DESIGN

HARNESSING THE HUMAN DRIVERS OF POWERFUL LEARNING.

How might we win the battle for student engagement and commitment in learning? How might we create flourishing learning communities?

The need to ensure all students are deeply engaged and making progress in learning has never been greater. Yet, too often educators face the challenge of disengagement and distraction from those students struggling to make progress

or the frustration of mere surface compliance from high potential learners. Drawing on research from the science of learning and case studies of leading practices from around the world, Simon argues that the design of the future of learning must be driven by a key driving question: How can we make learning more human? This session is designed to cut through the noise surrounding the future of learning and give educators real insight into how they can build on their existing practices to create MORE HUMAN learning futures together.

Simon will lead your audience in an inspiring and practical unpacking of:

- > The emerging challenges and opportunities for learning
- > The human drivers of learning that are the key to unlocking engagement and growth
- > How digital technologies can redesign learning, but explain why most technology-driven attempts to improve learning fail
- > The critical behavioural and attitudinal shifts required of educators and students

Dr Simon Breakspear – Executive Director of Agile Schools

Dr Simon Breakspear is known internationally for helping educational leaders navigate disruptive change, develop innovation capabilities and drive continuous improvement for better learning. Simon is a Research Fellow of the Asia Pacific Centre for Leadership and Change at The Education University of Hong Kong, and the Executive Director of the leadership development organisation Agile Schools. Simon holds Bachelors degrees in Psychology and Teaching, a Masters of International and Comparative Education from the University of Oxford and a PhD in education from the University of Cambridge.

Department of Education

The feedback I received was overwhelmingly positive. Simon thoroughly engaged the audience and set the tone for the whole conference.

I couldn't have asked for more.

- President - Educate Plus

Working with Simon is the safest way to make sure a high profile, ambitious event for school leaders breaks new ground and leaves people wanting more. From the start of the planning, through to the post-event and follow-up, Simon took charge, covered every detail small and large, and delivered one of the most compelling, engaging, and provocative global workshop we've run.

- Microsoft Asia

Delegates from our conference are still raving about Simon! His informed thinking was engaging, entertaining and educational; adding a great deal to our conference, through both his keynote and contribution to our panel session.
